

# sysmetric

onsite software services  
offshore development  
accountancy outsourcing

**Sysmetric are a software and services house dedicated to maximising payback on your investment.**

**Our business oriented outsourcing solutions enable us to reduce your time to market.**

Our approach of 'thin' onsite and 'fat' offshore telecomputing dramatically reduces cost yet maintaining productivity.

Our model of taking specifications, check listed communication procedures and structured approach to milestones for delivery and review, remove physical distance as a constraint.

Our contractual modalities allow you to interact with a legally responsible representative in your area.

Our primary facility in Kolkata, India is ALWAYS available for inspection.

## **Philosophy**

We utilise existing resource whenever possible, optimise client investment, ensuring payback.

Our team comes to you with sharp skill sets. We hire only seasoned project managers and consultants who avoid errors that novices are prone to make. This helps you avoid slippage due to re-work.

## **Why Us Indeed!**

Our obsession to deliver on time, within budget and to exacting quality standards.

Our Incredibly competitive rates.

Our motto of giving you virtuous solutions in a virtual world.

## **Deliverables**

Our deliverables are SMART. They are:

- Specific
- Measurable
- Achievable
- Realistic
- Time Bound

## Onsite software services

Our consultants work in the UK, central Europe and the USA. We have also successfully completed projects in France, New Zealand and, of course, India

We specially groom our consultants so they rapidly gel with your way of doing things

We are open to YOUR project management

We bill you locally

Our project managers, software engineers and media designers travel to your location and work onsite for contracts ranging from three months to two years.

## Offshore software development

We provide "best-in-class" offshore software development services to you out of India.

Our past experience with our international clients from USA, Europe, Africa and Oceania makes us deliver the best possible quality, at significant cost savings to you, every time!

We safeguard your intellectual property, proprietary software and new development specifications with very high levels of security.

## Accountancy outsourcing

### Book-keeping

We provide reliable book-keeping services using specially developed secure web based technology combined with traditional accounting practices.

### Accountancy

The preparation of accounts of all entities from various stages of (in !!) completeness to finalisation, abbreviated accounts and a variety of "non-limited entity" formats as required.

### Payroll

Our payroll service compasses all periodicities and includes net-to-gross, all compliance etc. and includes complex payrolls with critical deadlines.

### Taxation

We help clients comply with increasingly stringent tax regimes. Provided we are given timely information, the basic tax returns will easily be prepared.
